system**

DD-WMS 100

WATER MANAGEMENT SYSTEM

CONSTANT WATER SUPPLY

A single unit for the supply of cooling water, collection and filtration of waste water from diamond drilling systems

FEATURES

- Greater productivity – provides up to one full day of water autonomy for wet diamond drilling applications
- Keeps the jobsite clean – all slurry is collected by water collection system
- Easy disposal process – all the slurry is collected in the filter bag
- Ergonomic design – large wheels and handlebar make it easy to move the DD-WMS 100 around site

APPLICATIONS

- Suitable for all wet diamond drilling applications
- Works with all Hilti diamond drilling tools as well as other brands
- Operates in 3 modes – recycling, vacuum cleaning and water supply

One filter bag recycles waste water up to 7 times which equals up to 100 litres of water output

3 MODES OF WORKING. INTUITIVE INDICATORS

WMS 100 has three modes of operation: recycling, vacuum cleaning and water supply that ensures users' autonomy and leaves jobsites clean.

TECHNICAL DATA

Weight according to EPTA procedure 01/2003	19.7 kg
Supply cord length	5 m
Max. water pressure	7 bar
A-weighted emission sound pressure level	76 dB (A)
Lifetime Service ¹	1 year
Fleet Management	Yes
Protection class	Class I

¹⁾ according to EN 60745
